2011 is off to a very busy start. We have begun to gather community and staff input concerning the upcoming budget. Committees are investigating and providing options to address our technology and literacy needs. Of particular interest to many is our Board Advisory Team (BAT) for Facilities.

Based on responses from our December newsletter, we have assembled a team of community and staff members. The goals and purpose of the BAT are to:

- Study Otselic Valley’s facility infrastructure needs;
- Study Otselic Valley’s educational program needs;
- Represent the public’s views and interests;
- Communicate with the public;
- Determine consultants required to complete the study;
- Determine how to address our infrastructure and educational program needs; and
- Report to the Board of Education and make recommendations for action.

To help gather information from the community, there will be meetings at each building. The first community meeting in Georgetown will be at 7:00 p.m. in the Elementary School Gym on Tuesday, February 8. The first community meeting in South Otselic will be at 7:00 p.m. in the High School Cafeteria on Thursday, February 10. These are the first of many meetings to come but your input will be especially valuable at the beginning of this process.

If you are unable to attend either meeting, I have included a list of committee members below. Please speak with them about your ideas and concerns, so that your voice can be heard. If you would still like to be considered for the committee or have questions, please contact the District Office at 653-7218. We look forward to hearing from you.

—Richard J. Hughes, Superintendent

Please Note

If our school begins with a one-hour delay, depending on weather conditions one of four things could happen:
- we may open;
- we could go to a two-hour delay, then open;
- we could go to a two-hour delay, then close; or
- we could close.

So, please continue to watch and listen for updates.

Pertussis Vaccination

The best way to prevent pertussis is to get vaccinated. There are vaccines for children, pre-teens, teens and adults. The childhood vaccine is called DTaP, and the pertussis booster vaccine for adolescents and adults is called Tdap (CDC). Please contact your doctor about receiving this vaccination.

For further information visit [http://cdc.gov/pertussis/index.html](http://cdc.gov/pertussis/index.html)
Flu Alert—Prevention and Treatment Information

How can you help prevent the flu?
There are simple actions that you can take to help reduce your child’s exposure to flu viruses and the risk of developing the flu:
• Wash your hands often, especially after you have been out in public or touched things that other people have touched, like a grocery cart, a gas pump or even a doorknob. Your child should wash his hands after sharing toys or books with friends.
• To prevent spreading the flu, turn your head when you cough and sneeze into disposable tissues.
• Do not expose infants to large crowds during the flu season.
• Avoid close contact with family members who have the flu.

What is the treatment for the flu?
There are four important things to remember when treating a child with the flu.
1. Rest—Your child should get plenty of rest, but he should perk up at least briefly every four hours. If he does not have brief periods of feeling better, call your doctor.
2. Fluids—The best fluids are clear liquids, including water, clear juices and sports drinks. If your child rejects most solid foods for a day or two that is okay, as long as he continues to drink well and urinate normally. If your child does want to eat, feed him bland foods in small amounts.
3. Fever Control
   • Treat the fever using an acetaminophen or ibuprofen product such as Tylenol® or Advil®. Never use any product containing aspirin or stomach-coating liquids with salicylates. Check the product’s label carefully for these substances.
   • One final key to controlling your child’s fever is how he is dressed or how he is covered when in bed. Bundling him up will make it harder for the medicine to lower his temperature. Dress or cover your child as you normally would for the temperature of the room he is in.
4. Close Observation for Signs of Complications
   • These signs include very frequent cough, rash and vomiting.

When should you seek medical help?
If your child:
• Is breathing rapidly or having trouble breathing;
• Is having convulsions or a seizure;
• Is not alert or is disoriented; or
• Has persistent vomiting.
You should also call the doctor if your child is more susceptible to the flu or a complication. For example, if your child is:
• Under two years-old;
• Has a pre-existing medical condition, such as diabetes, asthma or kidney disease; or
• On treatment or has a disease that decreases the body’s ability to fight infection.

What other treatments can help?
Two other treatments may help in some cases.
• Decongestants and antihistamines usually do not work very well for children. However, if a certain medicine has worked well for your child in the past, try one dose and continue only if it is clearly helpful. Cough medicines are not recommended for the flu, as coughing is the body’s way of cleaning the lungs. Be sure to follow package directions for dosage amounts.
• Prescription medications are available to treat the flu. However, there are some facts to be considered.
   • They must be prescribed by a doctor.
   • They must be given within 48 hours of the first flu symptoms, or they will not help.
   • At best, they will reduce the length of your child’s illness by 24 to 36 hours.
   • Some may have side effects.
   • At times, the liquid form of these drugs may be hard to find.

Given these facts, many pediatricians do not prescribe these medications for previously healthy children with the flu. The medications may be used for children who are hospitalized or who are at high risk from complications because of underlying medical problems.

If you are unsure if your child has the flu, you suspect your child may have the flu, or your child does not respond to these recommendations, contact your pediatrician or family doctor immediately.
Rx Drug Abuse Information

Within the past year the CDC (Centers for Disease Control and Prevention) released a report stating that one in five teens or twenty percent are abusing prescription drugs. The abuse of Rx medications seems to be the fastest growing area of drug abuse for teens. Some pundits have even named the current generation, Generation Rx. Drug abuse of this nature is on the rise in our area but not yet at the level of national trends.

The following are some suggestions that will help ensure that this trend does not rise to the level seen across the nation. Teens are often getting caught raiding their parent’s or grandparent’s medicine cabinets in order to obtain these medications. Monitoring and securing medications are two obvious but simple ways to help combat this issue. Another suggestion is to get informed. Listen to the language that teens use and do not be afraid to ask them to explain their vernacular. Here is just a sampling of some of the slang that teens use for Rx Drug use: Pharming, Z-Bars, Blueberries, Addys, Vitamin R and many more. Pharming or Pharm Party refers to the idea of kids securing a variety of pills from various sources and getting together and taking the pills. As for the rest of the slang terms, your challenge is to take this on as a homework assignment, do the research and get informed. I suggest a visit to www.Nida.nih.gov or contact your friendly School Prevention Counselor. Good luck!

—Catherine Lamphier Young, Prevention Counselor

Know Your Rights!

Seniors in Section 2 of Participation in Government have been studying civil liberties. Because many students at OV are unaware of their rights or understand their rights in school are not always the same as those afforded to the general public, the seniors have created public service announcements aimed at educating our Vikings about their civil liberties. With Mrs. Osowski and Mrs. Leblanc, students have researched specific court cases pertaining to teen civil liberties, discussed what a PSA is and the elements involved, and have been responsible for writing the script, recording, editing, and creating an original music score. The PSAs are currently airing on O.V. TV as part of the morning announcements.

Fact or Fiction?

As part of the unit on Civil Liberties, students in Section 1 of Mrs. Osowski’s Participation in Government class have read George Orwell's 1949 novel, 1984 and compared the fictional society of Oceania, where citizens lost their right to privacy, with the help of technology and compared it to our world today. Students looked at and discussed current issues including social networking, advances in medical technology, as well as the new TSA policies of body-scanning. Students noted how the technology discussed in the novel is no longer science fiction and how citizens needed to be proactive in protecting their privacy.
Senior Class Information Station

First and foremost we would like to thank all parents/guardians who helped us make it through basketball concessions. We could not have done it without you.

Any senior who worked at concessions or donated items may use those points to help defray the cost of any senior expenses that occur in the next five months. They cannot be used for deposits. The following list is not inclusive of all expenses.

- Yearbook (Final payment due May 1, 2011)
- Graduation Announcements (Ordered through Jostens)
- Senior T-Shirt/Sweatshirt
- Senior Trip

Senior Trip

As you know we are planning our senior trip to Baltimore/Ocean City, MD, June 3-5. Itineraries were sent home in November. Please make note of the following payment schedule. The amount of the trip is based on 20-25 paid students.

- February 14—$100
- March 14—$200
- April 18—$100
- May 1—$70

A mandatory meeting for both parents and seniors going on the trip will take place on Tuesday, April 26 at 7:00 p.m.

Please RSVP to Ms. Slocum or Mrs. Wood if you cannot attend so that other arrangements may be made to go over trip information, rules and regulations and to sign the code of conduct.

We can be contacted at dslocum@ovcs.org and lwood@ovcs.org or you can call the High School Office at 315-653-7218 to leave a message.

Happy Valentine’s Day!

FFA Notes

The FFA and Junior FFA would like to thank all the generous blood donors who participated in December’s blood drive. It was a successful drive as we were able to help over 70 people with the blood collected. It never ceases to amaze us at all the heroes among us.

While doing community service is important, we also took some time for fun during the WinterFest contest right before Christmas break. The FFA performed an airband skit to the song Big Green Tractor by Jason Aldean. The Junior FFA performed an airband skit to the song, She Thinks My Tractor’s Sexy by Kenny Chesney. The Junior FFA skit came in second place!

Respectfully submitted,
Travis Sheldon, FFA Reporter

Jr./Sr. High School Citizens of the Month

During the 2010-2011 school year the Jr./Sr. High School will be selecting students on a monthly basis to receive the Otselic Valley Citizen of the Month Award. This award honors students who have met the following criteria:

- positive interaction with teachers;
- positive interaction with peers;
- satisfactory academic performance; and
- following the rules.

December 2010 Otselic Valley Citizens of the Month

**Grade 7**
- Coleman O’Hara, son of Douglas and Leshia O’Hara

**Grade 8**
- Colby VanVoorhis, son of Gary and Patricia VanVoorhis

**Grade 9**
- Lauren Harris, daughter of Stephen and Phyllis Harris

**Grade 10**
- Esther Lyon, daughter of Jay and Judy Lyon

**Grade 11**
- Logan Carsten, son of Seth and Kathleen Carsten

**Grade 12**
- Coleman Ellis, son of William and Janie Ellis

---

Family and Consumer Science Classes

**A fun community service project!**

Mrs. Sutton’s Family and Consumer Science classes were asked to bake cookies for Santa’s appearance at the pavilion in South Otselic on December 18. The Grange, Fire Department and American Legion sponsor this event every year. With the donations of baking supplies from many community members, we went right to work and baked over 12 dozen assorted cookies. Although the evening was chilly, the cookies and hot chocolate kept us warm and energized.

**7th Grade students to participate in Cooking Up Fun**

Sixteen 7th grade students will be able to participate in another Cooking Up Fun: Vary Your Veggies after school program. Students will learn safety in the kitchen while preparing six tasty dishes. Be sure to ask your 7th grade student to prepare it at home as well!

The program begins January 12 and runs through February 17. Sign ups are on a first come, first serve basis.

---

Wall of Fame Nominations

The Wall of Fame Committee is accepting nominations for the 2011 induction ceremony. We are looking to recognize graduates, current or former employees, volunteers and/or friends of the Otselic Valley Central School District who have made outstanding contributions in their fields.

Please contact Richard J. Hughes at 315-837-4407 or Scott Poreda at 315-653-7218, for more information.

*See application on the next page.*
Otselic Valley Central School
Wall of Fame Nomination

About the Nominee

Name: _____________________________ Telephone: _________________________
Address: ___________________________ E-Mail: _____________________________

If a graduate, year of graduation: ________________________________
If an employee, years of service at OVCS: ________________________
If deceased, name, address, and telephone of closest living relative:

_____________________________________________________________

_____________________________________________________________

_____________________________________________________________

Attach a brief summary for the following items about the Nominee:

1. A career description and commitment to strive for excellence in career pursuit and/or community service.
2. Honors and achievements (special awards, recognitions, outstanding performances, etc.).
3. A description of how this person is a positive role model who has motivated others to achieve their highest potential.

About the Person Submitting this Nomination

Name: _____________________________ Telephone: _________________________
Address: ___________________________ E-Mail: _____________________________

If a graduate, year of graduation: ________________________________
If an employee, year of start at OVCS: __________________________

Please return completed nomination to: Wall of Fame Committee

High School Library News

7th Grade Spanish Classes
Ms. Connelly’s 7th grade Spanish classes have been working on creating their own weather reports. The students have been working in groups to locate Spanish-speaking cities and to give realistic reports of the weather there—in Spanish, of course! The students were filmed in front of a green screen, which allows them to use iMovie technology to superimpose their video over a photo of their city. The result? Weather reports on location, everywhere from Chihuahua, Mexico to Santiago, Chile!

Ms. Eschen’s classes have been creating documentaries about animals using the library’s iMacs. After researching their chosen animals, they have used Garage Band to record their reports, and iPhoto and iMovie to match photos with their words. The result? Great, and informative, movies!

High School Book Club News
Before the holidays, the High School Book Club once again ventured to the Elementary School to read with young students. We were able to spend time with the kindergarten, first grade, second grade and some third grade classes, as well as helping Mrs. Bucalo’s class with crafts. Students of all ages enjoyed connecting with each other and making new friends!

Hello OV! This month’s Physics Corner column focuses on a special day of demonstrations from my 8th Grade Physical Science class. Back in early December, the class decided to take it down a notch for a day—and turn up the heat! Mr. Witmer did a number of flame-based demonstrations for the class, which the students loved. The demonstrations focused on the principles of physical and chemical change and the differences between elements and compounds.

The crowd-pleaser was a pair of Whoosh Bottles. These setups consisted of empty water cooler bottles filled with flammable ethanol vapor. A lit match was lowered into each bottle and . . . Whoosh! The vapor combusted rapidly and a column of flame rocketed into the air! Though the show value of this demonstration was important, every necessary safety precaution was taken to ensure the safety of everyone present! Thanks for visiting the Physics Corner, and be sure to look for a new column next month!

—Mr. Witmer

First Grade in the Library

First graders have been having fun in the Library learning about our senses. We read an old folktale from India, The Blind Men and the Elephant, retold by Lillian Quigley, in which six blind men learn about the parts of an elephant by touching an elephant. Then we reached into our sense box and, with our eyes closed, tried to tell which stuffed animal we were holding just by touching. We listened carefully to The Loudest Noise in the World, by Benjamin Elkin. (Do you think if everyone shouted at the same time that would be the loudest noise in the world?) Then we used our sense box to identify things just by hearing the noise they made: scissors cutting, paper tearing or a pencil writing. We smelled peanut butter, apple and banana in our sense box after reading Mucky Moose by Jonathan Allen, about the smelliest moose in the forest (his best friends are the skunks), and used our eyes to identify hidden pictures in Tana Hoban’s Look Again!

Finally we had our tasting party. First, we read Gregory the Terrible Eater, by Mitchell Sharmat. Then we had a tasting party, in which we ate something sweet (Oreos, lollipops), something salty (popcorn, pretzels), something sour (sour worms, lemons and limes), and something healthy (apples, bananas.). If we use all our senses, and read, we can learn so much about our world!

Science News

5th Grade

The 5th grade has started their Human Body unit. This is always a fun way to find out how our bodies work. Using card stock, students make models of the skeleton and internal organs, placing them inside the skeleton.

6th Grade

The 6th graders are studying cell biology. They will draw and label plant and animal cells on the computer. As well as learning all the functions of the cell parts they learn about bacteria, viruses and molds. This is a continuation of the human development unit which also includes the study of our immune system.
